

# BAKER/FLINK REVERSIBLE WITH DISCHARGE CHUTES

454-4860

## Original Tripping Cutting Edge

Unique design eliminates stress and damage by tripping over obstacles and instantly re-engaging when moldboard clears obstruction.

## ***NEW FROM BAKER/FLINK!***

The Baker Flink Model 454-4860 was designed for high speed plowing of turnpikes, airports and highways. Flink's specially designed plow can be used as a high speed plow in either right hand or left hand discharge, or in a straight plowing position.

Flink Company's discharge chutes are designed to elevate and throw the snow a greater distance. This feature combined with the Baker/Flink lower trip edge makes this plow one of the most unique plows on today's market.

**Manufactured By Flink • 502 N. Vermillion St. • Streator, IL 61364**
